EXPERIENCE

Developement Intern   Oct 2021 - Feb 2022
collegestartups.in   *Pune*

During my five months with collegestartups.in, I worked on two projects: Caliber (Student Profile Builder) and Earnium (Loyalty Management Website). Worked on backend development and databases using Nodejs, ExpressJs, Mongoose, MongoDB, and Spring Boot and front-end development using React, HTML, CSS, Material-UI, etc.

PROJECTS

URL Shorten — HTML/CSS, NodeJS ,Rest API
Website in which user can convert long URLs to short URLs and it also stores the records of URLs recently shortened (Try it here)

Developer Profile — HTML/CSS, React, NodeJS , Rest API,GitHub API
A platform where any developer can create their profile and look other's profile. The developer's profile consists the developer's info with profile links and description. (Try it here)

Movie Review Website — HTML/CSS, React, NodeJS , Rest API, MongoDB, Mongoose
A website which provides ratings, reviews and information of multiple movies that can guide user to watch movies. The user can also rate and review any movie once by signing (if account is not registered) or login (if user is already registered). (Try it here)

Foodie — HTML, CSS. JavaScript, React, MongoDB, NodeJS, ExpressJS
An online food delivery website where users can order any cuisine from restaurants in their city and track it using Mapbox API. It also has admin pages for city, restaurant, delivery executive as well. (Try it here)
